

GROWING TOGETHER

INDUSTRIAL & CONSTRUCTION

INDUSTRIAL & CONSTRUCTION PRODUCT RANGE BOOKLET

Whether it is loading or excavating, lifting or material handling – you are looking for reliable high-performance tires so that you can do your job in full safety. Browse for your tire based on your specific type of industrial machinery.

INDUSTRIAL & CONSTRUCTION PRODUCT RANGE

BOOKLET

Traction pattern

Used in construction and farm areas for industrial applications, on soft soils and loose grounds where traction is required.

Smooth pattern

High stability and long life. Used in severe conditions, hard soils. Very high resistance to damages. Typical use on compactors or heavy industrial machines.

Rib pattern

Low rolling resistance and wear. Optimal performances on road transfer and port areas.

Block pattern

Large supporting surface, good wear and protection. Good traction on soft soils.

Solid tire

Very closed pattern for improved wear and stability. Used in warehouses and logistic areas.

Semi smooth pattern

High protection against cuts and tears. Good traction on hard surfaces and best stability during lifting mode. Used in port and logistic areas.

Bias tires

Very stiff carcass suggested when high stability is required. Preferred on small machines used in construction areas and big material handling machines.

Bias tires have cord plies that are arranged running diagonally from bead to bead across the tire. Layers overlap forming a crisscross pattern. This design features extraordinary sidewall resistance, puncture resistance and high load capacity.

Radial tires

Suggested when the machine covers high distances. Wider footprint area guarantees better wear, traction and lower rolling resistance with a better fuel consumption compared to Bias tires. Radial tire structure helps heat dissipation on heavy operations and protects against punctures. Better comfort during operation.

Radial tires have cord plies that are arranged running radially from bead to bead around the tire. Sidewall and tread have independent functional features providing more flexibility, great performance, durability, and fuel economy.
